

800DLX Eterna Deluxe ~ Professional Grade	
Bore Size	.462" large bore
Slides	Hand lapped nickel silver inners & yellow brass outers
Mouthpipe	Sterling silver
Hand Spun Bell	4 3/4" diameter, tempered sheet & sheet rose brass
Additional Features	First slide saddle; Fixed third slide ring & stop; Bronze valve casings; Solid finger buttons; Lever waterkeys; Art deco bell engraving
Finish Options	Clear lacquer or bright silver plate
Warranty Coverage	Gold Five Year Warranty Lifetime Piston Warranty

800 Eterna Series ~ Professional Grade	
Bore Size	.460" medium-large bore
Slides	Hand lapped yellow brass inners & nickel silver outers
Mouthpipe	Gold brass
Handspun Bell	4 3/4" diameter, two piece yellow brass
Additional Features	First slide saddle; Fixed third slide ring and stop
Finish Options	Clear lacquer or bright silver plate
Warranty Coverage	Gold Five Year Warranty Lifetime Piston Warranty

580S Capri Series ~ Step Up Grade	
Bore Size	.460" medium-large bore
Slides	Hand lapped nickel silver inners & yellow brass outers
Mouthpipe	Nickel silver
Handspun Bell	4 3/4" diameter, two piece yellow brass
Additional Features	First slide trigger; Adjustable third slide ring and stop
Finish Options	Bright silver plate only
Warranty Coverage	Gold Five Year Warranty Lifetime Piston Warranty

*Getzen Company Philosophy*

Each and every Getzen instrument is proudly crafted in Elkhorn, Wisconsin by a team of artisanal craftsmen and women. Individually handmade, the way it was done in 1939 when the company was founded by Anthony “T.J.” Getzen in a barn behind the family home.

At Getzen, we don’t believe in cutting corners or taking short cuts just to boost the bottom line. That’s because every instrument produced here bears our family name and that means something to us. We hope it means something to you too, because when you invest in a Getzen, you aren’t just buying a new instrument. You are becoming a part of a family’s tradition and heritage that has spanned four generations. A dedication to providing musicians at all levels with the finest, American made instruments available.

3850 Bb Custom Series ~ Platinum Professional Grade

Bore Size	.462" large bore
Slides	Hand lapped yellow brass inners & nickel silver outers
Mouthpipe	Gold brass
Handspun Bell	4 3/4" diameter, seamless copper
Additional Features	First and third slide triggers
Finish Options	Clear lacquer or bright silver plate
Warranty Coverage	Platinum Lifetime Warranty Lifetime Piston Warranty

3810 C Custom Series ~ Platinum Professional Grade

Bore Size	.460" medium-large bore
Slides	Hand lapped nickel silver inners & yellow brass outers
Mouthpipe	Gold brass
Hand Spun Bell	4 3/4" diameter, one piece, hand hammered yellow brass sheet; Tone Balanced design
Additional Features	First slide saddle; Fixed third slide ring & stop
Finish Options	Clear lacquer or bright silver plate
Warranty Coverage	Platinum Lifetime Warranty Lifetime Piston Warranty

3892 Eb Custom Series ~ Platinum Professional Grade

Bore Size	.460" medium-large bore
Slides	Hand lapped nickel silver inners & yellow brass outers
Mouthpipe	Gold brass
Hand Spun Bell	4 3/4" diameter, seamless copper
Additional Features	First slide saddle; Fixed third slide ring & stop; Two included tuning bits (American sound & British sound)
Finish Options	Clear lacquer or bright silver plate
Warranty Coverage	Platinum Lifetime Warranty Lifetime Piston Warranty

Proudly Made In America

Just like in 1939, when the company was founded, all Getzen Company instruments are proudly made in Elkhorn, Wisconsin U.S.A. Not “designed to our specifications” in America, but built somewhere else. Not assembled or finished in America from globally sourced components. One of the last instrument manufacturers whose full line is actually made in America, by the finest American craftsmen and women. A fourth generation, family owned business proud of what “Made in America” means.

Why Nickel Silver Pistons?

All world famous Getzen pistons are made from nickel silver tubing. Nickel silver is corrosion resistant and, unlike other piston materials, does not soften under exposure to the high heat required to braze in the piston liners. Adding a nickel plate layer to the piston creates an outer surface that is extremely hard, dense, and lubricious. All desired attributes when creating a long lasting, bearing surface. Fast, consistent, durable, and backed by a lifetime warranty.

Hand Spun Bells

Why do all Getzen instruments feature hand spun bells? Hand spinning is key to proper bell crafting because it is all about the feel of the metal, the resistance of the tool, and the smoothness of the surface. The skilled hands of an experienced craftsman are required to ease the bell into shape without exposing the metal to excessive stress. Other manufacturers rely on automated spinning machines that utilize brute force to shape the bell. Sacrificing finished quality for production speed.

Precision Honed & Hand Lapped Pistons

Getzen Company pistons are world famous for their durability, silky smoothness, and lightening fast action. This reputation was earned, in no small part, by the fact that every Getzen piston is precision honed (for tight fit) and hand lapped (for smooth action) to tolerances as tight as .0015". This attention to detail creates an air tight seal with the appropriate compression all while eliminating the need for any sort of post-purchase “break in” period. We take care of that for you at the factory.

Tension Free Mounting

When done correctly, instrument mounting is a precise and time consuming procedure that takes years to master. One trick often employed to short cut the process is the use of jigs to clamp all of the parts together before soldering. While much faster and cheaper, this technique creates stresses in the instrument, negatively impacting resonance and responsiveness. Getzen instruments are hand mounted with the intent of eliminating this tension, freeing the instrument to perform as designed.
