Rain forests are beautiful, lush forests existing in many tropical parts of the world. The Amazon Rain Forest of South America covers over a billion acres. More than 20% of the world's oxygen is produced there, and more than half of the 10 million known species of animals, insects and plants live there. Many rain forests in the world are in danger, due to efforts to cut and burn the trees.

Since it was first invented, the piano has had **pedals** or something similar. In the 1700s, levers that were pressed upward by the player's right knee were used on some pianos instead of pedals. The modern piano usually has three pedals, although some have only two. The damper pedal (on the right) is the most frequently used.

The Damper Pedal

- Trace the pedal markings for the example. Then play and count aloud.

Count: 1 + 2 + 3 + 4 +

- Draw pedal markings for the example, changing the pedal on beat 1 of each measure. Then play and count aloud.

- Now Play This:** Play and count aloud. Notice the pedal sign.

The song, **The Galway Piper**, refers to playing bagpipes in the city of Galway, Ireland. Irish bagpipes are usually smaller and more difficult to play than the better-known Scottish bagpipes. It is said that “it takes 7 years to learn, 7 years to practice, and 7 years to play” before a piper is considered an expert.
